

ILLUMINATE lamp

Design by FRED & FRED, Years 2013, created in PARIS,

Lighting is mood.

You should be able to adjust your lighting to suit your mood anytime you want. Now you can project a texture on your walls, floor, and ceiling with our Illuminate Lamp.

Select an anti-glare lighting solution for your home or office from our beautiful collection of table, wall, column, signage, or our spectacular made-to-measure ceiling chandeliers.

Treat yourself to a work of lighting art with the *luminotherapy* properties of natural

Our lamps are meticulously designed by award-winning lighting creators **Fred & Fred**.

With architectural structure and patented technology, our beautiful lamps give you the lighting intensity you want - where you want it - without the glare.

Using eco-responsible elements with the latest low energy LED technology, our lamps are made of natural materials like glass and highly recyclable aluminum.

Make Your Illuminate Lamp Your Own

Although our Illuminate Lamps are ready-to-go, you can customize to suit your needs with the following options.

- Your lamp can be programmed to follow the natural cycle of daylight.
- Choose from two fine finishes: glossy transparent or softly frosted optical surface.
- Pick diffused light or a projected beam.
- Choose LED strips for soft lighting or backlit LED for more intensity.

- Customize your Illuminate Lamp by designing the shape of light you want. Create a pixel surface that can be developed in 3D on different levels.
- Fit your lamp with a "DMX Address" which allows you to link your lights to control them together or separately. Other options include adding motion detectors and atmospheric lighting detectors.

Technical Description and Installation

- Optical diffusion glass tile 227mm x 227mm x 10mm
- inox frame
- 9 LEDs, 24V, electronic board
- Frosted or transparent tiles, depending on use.
- 220V or 115V mains connection, depending on country standards
- Weight: from 1.8 kg per tile
- Wiring: Waterproof connection
- Controls and power: Control your Illuminate Lamp with a switch by DMX
- Characteristics of LEDs: 9 LEDs per tile; LED Osram Optical closure lamp [extensive 110° beam]; CE [EC Label]; Electrical characteristics Voltage 24v
