My Hive

Design: Poul Christiansen

My hive is a flexible workstation available in two different models: A spacious, rectangular workstation, and a hexagon-shaped one.

The key features of this product create a minimal and elegant expression:

First, instead of legs, My Hive integrates the table-top into the sound absorbent screens. Second, the mechanism for adjusting height is hidden behind zippers. Third, there is a smart case under the table used to store the cables.

Absorption

Attenuation

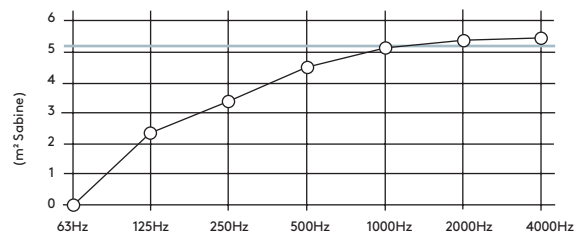

Materials:

The screen consists of a soundabsorbent filling mounted within a solid wood frame. Both sides of the screen are upholstered in fabric.

The fixed or height-adjustable desk is made of white laminate.

Concealed cables/mechanism.

Equivalent Sound Absorption Area
(m² Sabine)/Unit*

*=Test dimensions, My Hive 120°: 5,1 m² (blue line).

Measurements WxHxD (mm)

Workstation/Sofa

My Hive 120: 2010x1350x805

My Hive 90: 1610x1350x810

Tips from Abstracta!

Explore both forms and the variety of combinations to create dynamic and surface-efficient My Hive configurations!

In addition to a workstation, My Hive's partitioned cell can also be appointed with an integrated couch for breaks or informal meetings.
