

AK 1

PET Felt Workplace Divider

Design De Vorm

The AK 1 is a work place divider made out of PET Felt, a great solution in creating separate workspaces at one table unit. The AK 1 offers great sound dampening properties and is easily mounted to the table top.

Specifications

Material
PET Felt

Note
To use with tabletops from
20 up to 40 mm

Standard colour options
Light grey, Dark grey

Custom colour options
Olive, Marine, Green, Dark Green, Brown,
Beige, Pink, Turquoise, Yellow

Ingredients

PET Felt

Spring steel clamp spring

PE handle, galvanized threaded end

Cardboard honeycomb

PET Felt

PET Felt is made of recycled bottles which are turned into a soft, though strong Felt material, which is long lasting, UV stabilized and has great acoustic performance. PET Felt is both recycled as well as recyclable itself.

Martindale	Pilling
100.000	3/4

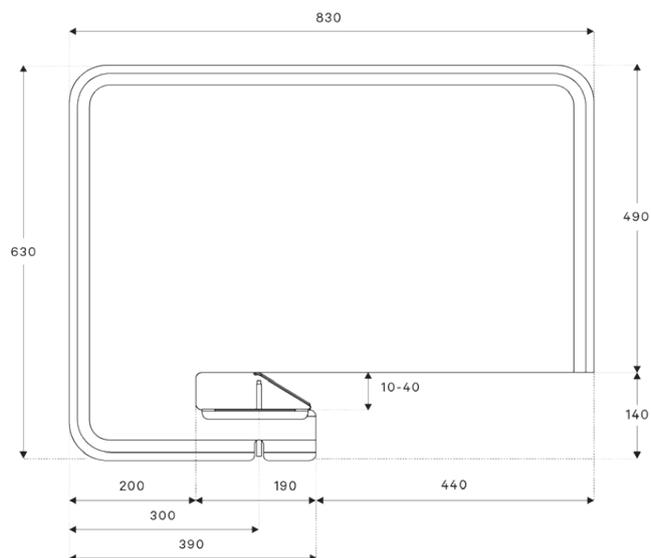

Note
PET Felt is made of recycled material.
Different products may have different
outcomes in the colour blend.

Sound absorption

Very good sound absorption at
the source, good absorption in
the low frequency range such
as vocal sounds.

Measurements

Weight – 4,5 kg

Carton box – 64,5 x 60 x 81,5; 0,3 m³

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
