PET Felt

PET Felt is made of recycled bottles which are turned into a soft, though strong Felt material, which is long lasting, UV stabilized and has great acoustic performance. PET Felt is both recycled as well as recyclable itself.

Martindale	Pilling
100.000	3/4

Note

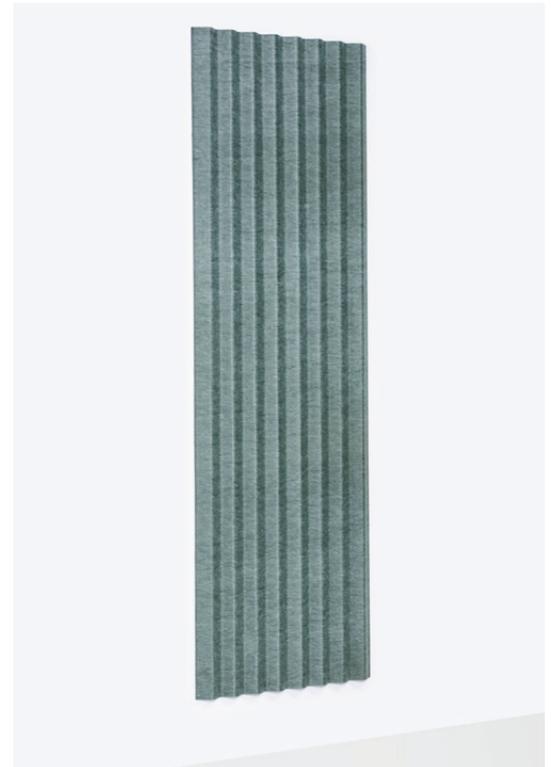

PET Felt is made of recycled material. Different products may have different outcomes in the colour blend.

Customize the colour

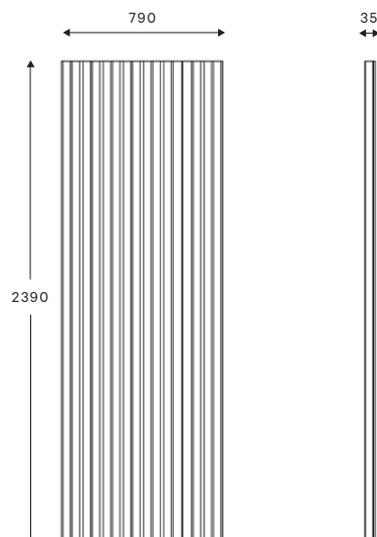

Choose from our 11 unique colour blends.

The options are there to make it blend in or stand out in any context.

The Mute matches perfectly with our PET felt furniture collection.

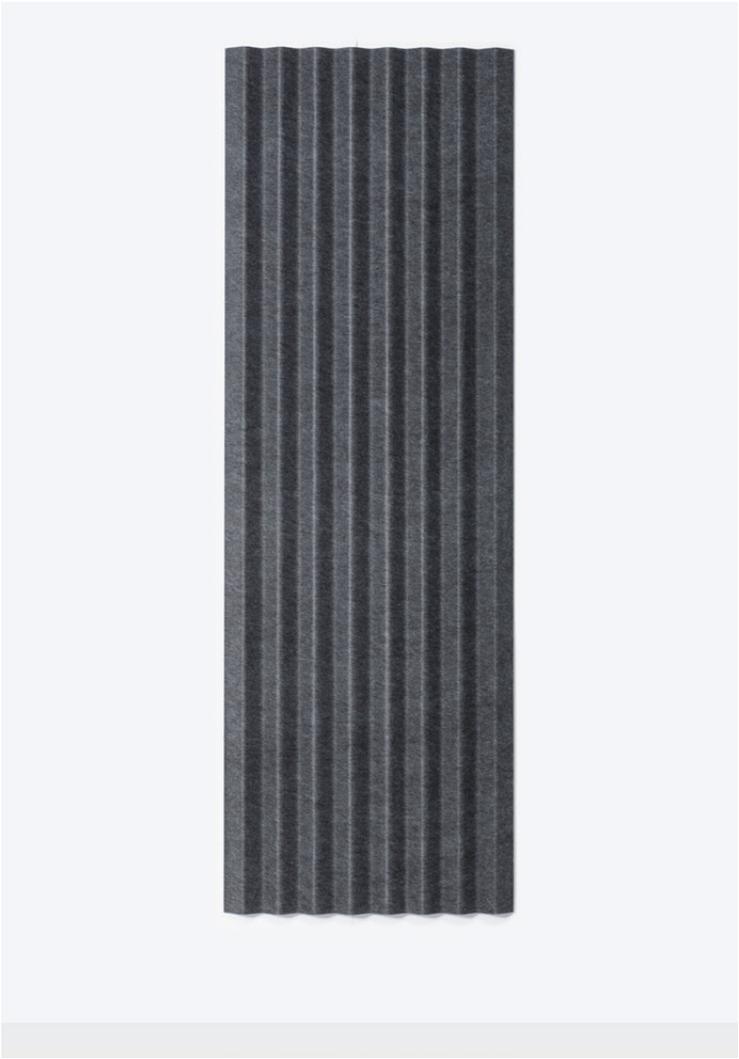

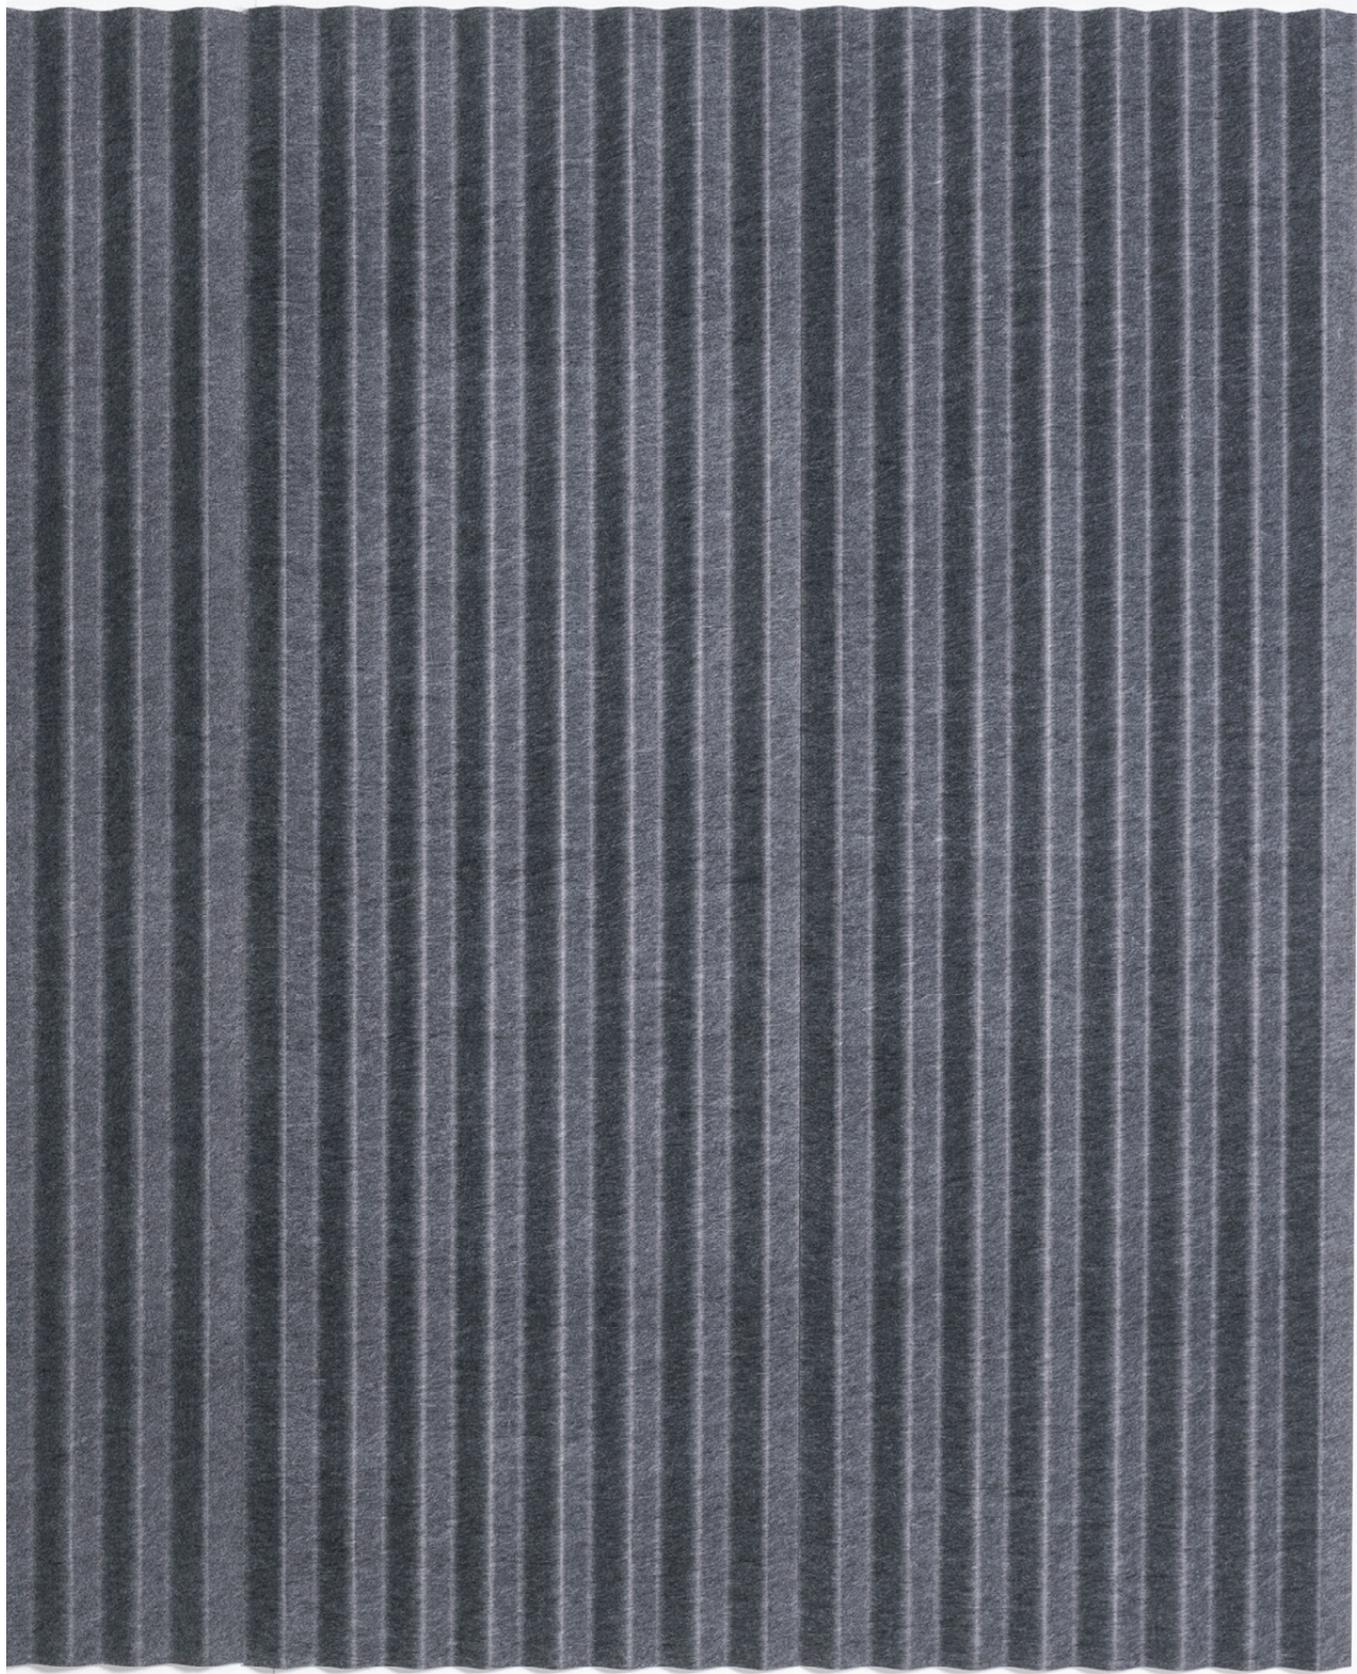

Measurements

Weight – 6,8 kg

Carton box – 180 x 240 x 15 cm

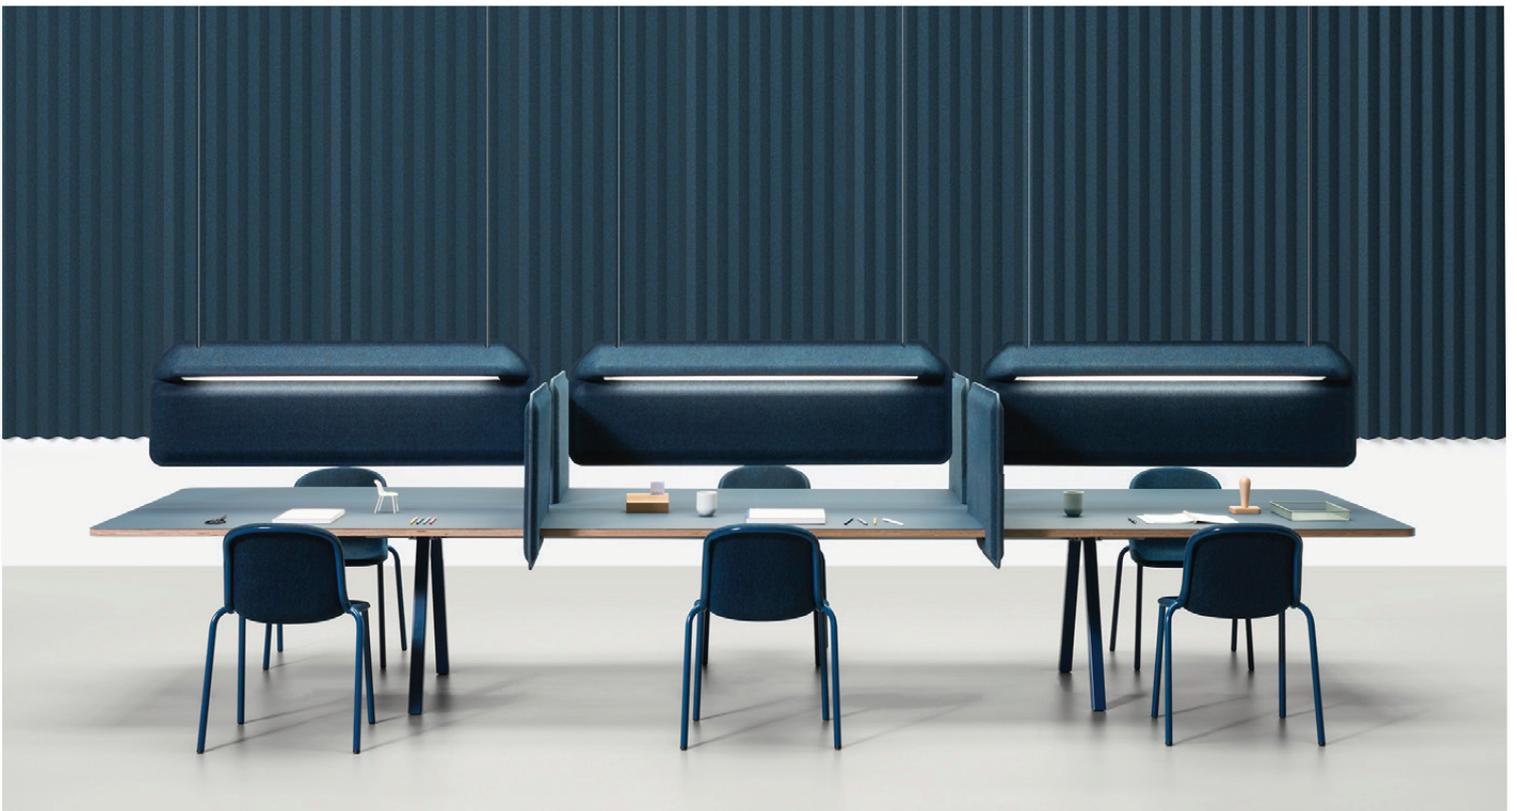

Minimizes sound reverberation

Made of recycled plastic bottles

Recycled and recyclable

Available in 11 different colour blends

Perfect match with our PET felt products

We create interior products by today's standards

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
